[1] The figures of Revenue and Expenditure are for the 12 months ended 31st December of each year until 1871, when the financial year was changed so as to terminate on the 30th June. The figures for 1871 are therefore for the six months ended 30th June, and the figures for subsequent years are for the twelve months ended 30th June.

[2] In addition to the quantity of land sold and amount realized within the year, the figures under the head "Land Sales" represent, during each of the years after 1868, the total extent of, and amount paid on, lands purchased under deferred payments of which the payments were completed within the year, although such payments had extended over a series of years. The extent selected, of which the purchase had not been completed, is not included in the area sold. This amounted at the end of 1880 to 7,668,344 acres. Lands granted without purchase, which amounted up to the end of 1880 to 5,070 acres, are also excluded.

[3] Since the year 1864, a considerable quantity of wool has each year been imported into Victoria across the Murray, from the Riverina district of New South Wales, for transport by railway to Melbourne and shipment thence. Prior to 1872 no precise record of the quantity so introduced was kept at the Customs. It has, however, been ascertained that at least 13,000,000 lbs. of wool, valued at £972,000, crossed the Murray into Victoria in the year 1870, and the following amounts in the years named:—19,552,598 lbs., valued at £1,096,772, in 1872; 31,542,913 lbs., valued at £1,745,550, in 1873; 35,332,089 lbs., valued at £1,975,879, in 1874; 40,535,081 lbs., valued at £2,260,799, in 1875; 44,430,185 lbs., valued at £2,039,009, in 1876; 37,647,218 lbs., valued at £1,661,868, in 1877; 43,357,702 lbs., valued at £2,081,368, in 1878; 46,561,653 lbs., valued at £2,338,670, in 1879; and 54,865,967 lbs., valued at £2,720,612, in 1880.

[4] The quantities of flour, bread, and biscuit imported and exported are reduced to their equivalent in bushels, on the assumption that one bushel of wheat produces 45 lbs. of either of those articles.

[5] The births and deaths given for 1853 are all of which there is any record; but it is known that the figures considerably under-state the truth, and it is supposed that each in reality amounted to not less than 5,000. The deficiency has chiefly arisen from the fact that the system of registering births and deaths was entirely changed during the year 1853, and the new system was not at first properly understood. In consequence of this, and also owing to the unsettled state of the goldfield population, it is known that many children born were neither baptized nor registered, and many persons who died were buried without registration or funeral service.

[6] Post cards first issued in April of this year.

[7] Prior to 1871 the expenditure was for the year ended 31st December. The figures for 1871 relate to the first six months only. Since that date they have been for the year ended 30th June, except as regards the Railway expenditure which in 1876 is for the eighteen months ended 31st December, and for subsequent years the twelve months ended 31st December. The figures do not in any case include amounts expended by municipal governments.

[8] These returns are those of the Government and private railways combined, the latter of which were purchased by the State in July 1878. The former returns are, prior to 1871 and subsequently to 1876, for the year ended 31st December; in 1871 for the six months ended 30th June; in 1872 and three following years for the twelve months ended 30th June; in 1876 for the eighteen months ended 31st December; and in subsequent years for the twelve months ended 31st December. The returns of private railways are for the year ended 31st December throughout.

[9] Post Office Savings Banks were first opened in 1865. Hence the increase in the amounts in these columns from that year. The returns for the Post Office Savings Banks are for the years ended 31st December, those for the ordinary Savings Banks are for the years ended 30th June.

[10] Until 1879 the figures did not give particulars of all the Friendly Societies in the colony, but only of such as furnished returns. For that year and 1880 the returns are complete.

[11] The increase in the number of telegrams commencing in 1870 was consequent on a reduction in the rates.

[12] Including purchase-money of the late Melbourne and Hobson's Bay Company's lines.

* This column embraces the Pensions of Lady Darling, of Mrs. Petrie, of Ministers relieved from office on the introduction of Responsible Government and on political grounds, and the Superannuation Allowances of Mr. Hoddle, first Surveyor-General of the Colony, and of Mr. Justice Williams.

Note.—The pensions and superannuation allowances referred to in this and the preceding table are those which would be payable, supposing the whole to be in existence throughout the 12 months. In consequence, however, of some of the allowances not commencing until the year has more or less advanced, in consequence also of some of the old ones falling in during the course of the year through the death of the recipients, the amount actually paid is always less than the amount shown on the list. The material for this return has been derived from statements furnished each year by the Honorable the Treasurer.

* The items in this Table are summarized according to the principle agreed to at a conference of Government Statists of several of the Australian colonies, held in Tasmania in the month of February 1875.

† Including cost of the following departments:—Chief Secretary, Government Statist, Shorthand Writer, Agent-General, Audit Office, Registrar of Friendly Societies, Inspector of Stock, Treasury, Stores and Transport, and Government Printer.

‡ Since 1874–5 the amount expended on school buildings has been paid entirely out of loans.

§ Including the sum of £18,000 lent by the Government to assist in developing the Mining Industry. The sum lent for this purpose in 1877–8 amounted to only £250, and in 1879–80 to only £500.

‖ Exclusive of school buildings, Railways, Water Supply, and of all public works paid for out of loans. Including endowments of municipalities under the *Local Government Act.* The expenditure on the Port of Melbourne, included under this head prior to the 1st January 1877, has since been paid out of the Harbor Trust fund.

¶ The provision of the *Local Government Act* 1874 authorizing the subsidy to municipalities having lapsed on the 31st December 1879, an amount equivalent to a half-year's subsidy was voted by Parliament. This accounts for the large decrease in the expenditure from "Special Appropriations," and a corresponding increase in that from "Votes."

** Extensive reductions in the Public service were made in 1877–8, which caused an increase in the amount of retiring allowances and gratuities.

†† Including Governor's salary, and salaries of Ministers, Commissioners of Audit, Agent-General, and expenses of Executive Council in all the years; also Public Worship until the middle of 1875–6, when State Aid was abolished.

‡‡ This account was created under the *Land Act* 1869 (33 Vict. No. 360, secs. 42 and 43), whereby it was provided that an amount of £200,000, proceeding from the alienation of land, should be placed annually to a trust account, the moneys standing to the credit of which should be available for the re-purchase of debentures, or the further construction of railways. The total amount which had been paid to this fund up to the 30th June 1879, all of which had been expended on the survey or construction of lines of railway, was £2,191,172 16s. 11d., viz., £1,800,000 paid in accordance with these provisions, and £391,172 16s. 11d. advanced from time to time under the *Railway Loan Act* 1876 (39 Vict. No. 531, section 11), and the *Railway Loan Act* 1878 (42 Vict. No. 608, section 11), which provide that advances to this fund out of the Railway Loans may be made in anticipation of the whole sum of money accruing and becoming available, viz., £2,200,000 up to the expiry of the Principal Act on the 31st December 1880.

§§ For details of Expenditure from Votes under this head, *see* Supplementary Table, *post.* The amounts in the column for Special Appropriations are the unexpended balances of the Pension Fund (Schedule D, part V.), repaid each year to the revenue.

NOTE.—For Items of Expenditure out of Loans raised under various Acts for the purposes of Water Supply, Railways, Public Buildings, State School Buildings, and Alfred Graving Dock, *see* Table of Loan Account Expenditure, *post.*

HENRY HEYLYN HAYTER, Government Statist.

* It is believed that the estimate of the population of Hotham given for the four years 1874 to 1877 was too high. The municipal authorities state that the figures furnished for subsequent years are reliable. † Figures of Census, 1871. ‡ Figures of Census, 1881.

* It is believed that the estimate of the population of Hotham given for the four years 1874 to 1877 was too high. The municipal authorities state that the figures furnished for subsequent years are reliable.

† The Census figures have been given for the population of the Shipping.

INTERCHANGE.

*** *In order to save time, the returns of Imports and Exports are published alphabetically as furnished by the Customs Department, instead of in classified arrangement as in the case of the Imports and Exports for 1875. In the "Victorian Year-Book, 1879–80," now being printed, the Import and Export entries will be found duly classified according to the system agreed upon at the Statistical Conference held in Tasmania in January 1875. (See Report of Conference, Parliamentary Paper No. 11, Session 1875.)*

[1] Prior to the end of 1867 the bulk of the gold received from other colonies was transhipped under bond, in order to avoid payment of the export duty; it therefore did not appear in the returns of Imports and Exports. Since that date the export of gold has been free, and consequently the receipts and shipments of gold have been embodied in the general returns in the same manner as those of any other commodity.——[2] Useful four-footed animals, such as horses, cattle, sheep, pigs, goats, asses, &c., are included in this line. Wild beasts, &c., are omitted.——[3] The returns of the year 1872 are the first which include the quantity of wool imported into Victoria across the Murray.

* Including wharfage and harbor rates for all the ports prior to 1st July 1877. On that date the wharfage rates for the port of Melbourne, amounting to over £100,000 per annum, were transferred to a Harbor Trust. A fifth part of these rates is still, however, paid into the consolidated revenue, and is included in this return. It amounted to £10,776 in the six months of 1877; to £21,183 in 1878; to £18,924 in 1879; and to £16,910 in 1880.

† Including excise duty paid direct into the Treasury.

‡ Including export duty on redgum timber. The whole amount collected in 1877 and portion collected in 1878 was, however, subsequently remitted.

Note.—This table has been compiled by the Government Statist from returns furnished each year by the Customs Department.

* Six months.

† In this column, in addition to the single journeys and to the return journeys (each counted as two), an estimate has been made of the number of journeys made by periodical ticket holders. This only applies to the Suburban lines, as upon the others neither return nor periodical tickets are issued.

‡ These railways were purchased by the State in 1879 from the Melbourne and Hobson's Bay United Railway Company.

Note.—This table has been compiled by the Government Statist from returns furnished each year by the Railway authorities.

* The financial year of Melbourne and Geelong ends on the 31st August, that of all other Municipalities on the 30th September.——† In many instances the value of town halls, furniture, waterworks, &c., has been reckoned by the municipal authorities as part of the assets.——‡ In this column the amounts of outstanding loans have been included with the liabilities.——§ The revenue of and expenditure on the local waterworks are not included.

NOTE.—The returns of Revenue and Expenditure in this table represent the *net* receipts and expenditure of the year under review, exclusive of credit and debit balances, bank overdrafts, loans, &c.; to ensure uniformity and accuracy, therefore, the returns in which these items were included have been corrected from the printed balance-sheets.

* In many instances the value of shire halls, furniture, plant, &c., has been reckoned by the authorities as part of the assets.——† In this column the amounts of outstanding loans have been included with the liabilities.——‡ The revenue of and expenditure on the local waterworks are not included.——§ No returns. Shire only recently proclaimed.

NOTE.—The returns of Revenue and Expenditure in this table represent the *net* receipts and expenditure of the year under review, exclusive of credit and debit balances, bank overdrafts, loans, &c.; to ensure uniformity and accuracy, therefore, the returns in which these items were included have been corrected from the printed balance-sheets.

[1] This column presents a statement of the average numbers attending at one service only on the Sabbath, and it has been pointed out that this mode of calculating the attendance does not render the returns of the different denominations strictly comparable, inasmuch as, in connection with some religious bodies, there are several services held on the same day, at each of which an entirely distinct set of worshippers attends, whilst, in the case of other denominations, the attendance at subsequent services always consists, to a greater or less extent, of the same individuals as were comprised in the first congregation.——[2] These figures are stated to be only approximate.——[3] The figures relating to the Congregational Union, the Baptist, and Church of Christ, are stated to be only approximate.

Note.—The returns of several of the denominations show smaller numbers than they did in the previous year, but it is questionable whether a falling off really occurred. It is to be regretted that some of the religious bodies do not possess any regularly organized machinery for obtaining accounts of their strength and progress. The same remarks apply to the Sabbath Schools, *post*.

[1] The average number attending not having been furnished for the year 1880, these figures have been calculated according to the proportion furnished for the year 1879.

[2] No returns having been received from the Congregational Union since 1877, the figures supplied for that year have been repeated.

[3] The figures relating to the Baptist and Church of Christ are only to be regarded as approximate.

NOTE.—Several of the denominations have not distinguished the sexes of teachers and scholars, hence the sum of males and females in the total line does not agree with the total of both sexes. *See* foot-note to table "Churches, Chapels, &c.," *ante.*

[1] The Spiritualists, although perhaps not strictly speaking Christians, are included under this heading. They do not occur in the returns prior to 1873.

[2] In the returns for 1875 the Wesleyan Methodist denomination, for the first time, furnished the "Average number of scholars attending." For previous years it returned the number on the rolls, which was different from the practice of other religious bodies.

[1] These amounts were received many years since. No Government aid has ever been given towards maintenance.——[2] Regular masters only. Visiting masters are not included.——[3] In connection with the Melbourne Grammar School there are three scholarships of the annual value of £21, for boys under 14, tenable at the school for three years; and two exhibitions of the same annual value, tenable for two years, open to the competition of boys proceeding to the Melbourne University, whose names have been for the two previous years on the books of the school, and who have passed the Matriculation Examination with credit.——[4] In connection with the Wesley College there is a scholarship called the "Draper Scholarship," which was established in memory of the late Rev. D. J. Draper, who perished in the *London*. It is of the value of £25, tenable for one year. Two other scholarships have also been founded by Mrs. Powell, to be called the "Walter Powell Scholarships," in memory of her late husband. They are of the value of £40 each, payable in two annual instalments of £20, and tenable on condition of the scholar pursuing his studies at the University. Accepted candidates for the Wesleyan ministry form a distinct division, but their admission is only a provisional arrangement awaiting the proposed establishment of a Theological Institution.——[5] St. Francis Xavier's College was opened during the year 1878, and many of the scholars were transferred to it from St. Patrick's, of which it is a branch.

[1] Three-fifths of the numbers in this column apply to inmates of the Melbourne Immigrants' Home, each individual being counted afresh each time he is relieved. Thus the same person may be counted over and over again many times in the course of a year.

[2] In the Melbourne Immigrants' Home the *distinct individuals* relieved during the years 1877, 1878, 1879, and 1880 have been given, instead of *acts of relief*, as in former years.

[1] It is probable that the figures in these columns do not always indicate distinct individuals, but acts of relief, and that a person relieved over and over again is the cause of as many entries as he is times relieved.

NOTE.—The returns of some of the societies do not distinguish the sexes of the persons relieved, hence the sum of the males and females on the total line does not agree with the total of both sexes. The returns of receipts and expenditure represent the *net* amounts received and expended during the year, exclusive of credit and debit balances, &c.

* The tobacco crop in 1879-80 is reported to have failed in most of the districts.

NOTE.—It is to be borne in mind, with reference to the returns of vines, that, whilst the acreage and number of vines, in common with the remainder of the Statistics, are for the year ended 31st March 1881, the quantity of grapes gathered and of wine and brandy made are for the previous season. The grape crop comes in too late to admit of its being returned when the Agricultural Statistics are collected.

NOTE.—The items in this Table do not represent the whole quantity of the respective crops grown, but only such as were taken cognizance of by the collectors. The minor crops are often raised in gardens, in which case the various descriptions would not be distinguished. They may be also grown upon allotments of a smaller extent than one acre, and these the collectors are not called upon to visit. The Table must therefore be looked upon as indicating the nature of certain crops grown in Victoria rather than the full extent to which those crops are cultivated.

* A large plantation of mulberry trees was reported to have been abandoned.——† Of this area 10 acres of wattle trees are reported to have failed. It is presumed that trees are only included in the tillage of the year in which they are planted.

NOTE.—The items in this Table do not represent the whole of the respective crops grown, but only such as were taken cognizance of by the collectors. *See* footnote to last Table.

* The figures in this column apply to purchased lands only. One hundred and ninety-eight of the manufactories were carried on upon Crown lands, and in these cases no valuation of the land has been given.

† In Williamstown, the railway workshops employ 451 hands (of whom 3 are females), the floating dock 8, the graving dock 19, and the two patent slips 33. These works being rather for executing repairs than for manufacturing, it naturally follows that the value of the materials used and articles produced bears a much smaller proportion to the number of hands employed than is the case in other municipalities.

* The figures in this column apply to purchased lands only. One hundred and ninety-eight of the manufactories were carried on upon Crown lands, and in these cases no valuation of the land has been given.

† Water works have not been included, as they are not, properly speaking, manufactories. A Table of all the water works in the colony is published at page 60, *post.*

‡ These particulars have been combined, in accordance with a promise made to the persons supplying the information that the contents of individual schedules would not be published.

Not included for reasons stated in headnote to this Table:—1. Four cheese factories and four meat-curing establishments.—2. Twenty-two bread and biscuit manufactories.—3. Two tallow rendering works.—4. One basket-making and one chaff-cutting works and nine sawmills and woodyards.—5. One marbleworks.—6. Seven goldsmiths', jewellers', and watchmakers' establishments.—7. Two brass and twenty-nine iron and tin works.

MANUFACTORIES, WORKS, ETC.—RETURN FOR ELEVEN YEARS.

*** *The works, manufactories, &c., respecting which information is given in this Table are all of an extensive character, except in cases where the existence of industries of an uncommon or interesting nature might appear to call for notice. Every bootmaker's, tailor's, dressmaker's, carpenter's, cooper's, blacksmith's, baker's, or confectioner's shop may, in a certain sense, be called a manufactory, but no attempt has been made to enumerate such places.*

EXTENT AND VALUE OF GOLD WORKINGS.

RETURN showing the Number of Distinct Quartz Reefs actually proved to be Auriferous, the Total Extent in Square Miles of Auriferous Alluvial and Quartz Ground actually worked upon, and the Estimated Value of Gold Mining Claims, and Lands held under Gold Mining Leases, in the several Mining Districts, during the Year 1880.

Mining Districts.	Number of Distinct Quartz Reefs proved to be Auriferous.	Extent in Square Miles of Auriferous Alluvial and Quartz Ground worked upon.	Estimated Value of Gold Mining Claims and Lands held under Gold Mining Leases.
			£
Ballarat District	349	160½	1,497,222
Beechworth District	900	341¼	475,010
Sandhurst District	777	143	2,608,200
Maryborough District	619	136	465,040
Castlemaine District	405	164	249,790
Ararat District	81	88½	257,992
Gippsland District	499	202	422,196
Total	3,630	1,235¼	£5,975,450

NOTE.—The number of "distinct" quartz reefs cannot be strictly correct, as parts of the same reef, in some localities, are held to be distinct reefs, and named accordingly. As the reefs are further explored, it is found, too, that what were supposed to be separate reefs are not really distinct. The extent of auriferous ground is here put down from estimates made by the Mining Surveyors and Registrars, not from actual surveys; and in a few instances the estimates of the present Surveyors and Registrars differ from those made by their predecessors. The figures vary from year to year; and as the shallow alluviums of the older goldfields are abandoned by the miners, they are taken up and occupied, under the provisions of the Land Act, by agriculturists and gardeners, consequently ground which one year was included in the estimated area of gold workings is excluded in another.

This Return has been received from the Mining Department.

AVERAGE YIELD OF AURIFEROUS QUARTZ.

RETURN showing the Average Yield of Gold from certain parcels of Quartz Crushed in 1880 in the several Mining Districts, from Returns made by the Mining Surveyors and Registrars.

Total	968,883	9	466,404	7	18	0	9	15·06

NOTE.—*The above table does not show the total quantity of quartz crushed in the several localities, but only the yield of certain "crushings" respecting which the Mining Surveyors and Registrars have been able to obtain information.* Owing to the circumstance that many of the machine-owners are unable to give, or are precluded from giving, information, it is impossible to get complete returns from every district, and, in considering the relative importance of each district as regards quartz mining, the tables relating to machinery should be examined and compared.

Since the first publication of the Statistics, information has been obtained concerning 17,061,414 tons 8 cwt. which have been crushed, and yielded 9,257,559 ozs. 12 dwts. 22 grs. of gold, being an average of 10 dwts. 20·45 grs. per ton.

This Return has been received from the Mining Department.

PRODUCE OF GOLD FROM QUARTZ VEINS AND ALLUVIAL WORKINGS.

RETURN showing approximately the Gold obtained from Quartz Veins and Alluvial Workings during the Year 1880.

	ozs.	dwts.
From Quartz Veins	497,889	15
From Alluvial Workings	282,183	5
Total Gold Exported and Minted	780,073	0

NOTE.—The above figures are but rough approximations. The Mining Surveyors and Registrars can furnish only estimates based on information afforded by the banks and gold-buyers, and on their own knowledge of the character of the workings in their districts. The check on the returns—and not a sufficient one—is that afforded by the returns of quartz and quartz tailings crushed, pyrites operated on, and washdirt and cement treated, which, however, cannot and do not comprise information respecting all the stuff put through the mills.

This Return has been received from the Mining Department.

NOTE.—The patents applied for numbered 1,097 during the period from 1854 to 1867, both years inclusive; 124 during the year 1868; 139 during the year 1869; 119 during the year 1870; 133 during the year 1871; 122 during 1872; 146 during 1873; 147 during 1874; 154 during 1875; 155 during 1876; 145 during 1877; 147 during 1878; and 158 during 1879: and 176 during 1880. The discrepancy between the actual numbers and those obtainable by adding up the columns may be explained by the fact that many patents refer to more than one subject, and have, consequently, to be classified under two or more headings.
